Experiment 2 · registered design, not results

What varies?	What is measured?
2 released backbones	1,500 updates per run
PD and LGD	5 retained checkpoints
0%, 25%, 50%, 100% credit	125 → 250 → 500 → 1,000 → 1,500
2 predetermined learning rates	Final step is the primary endpoint
2 paired training seeds	Full-table credit + native OOD
64 runs; both rates reported	Same five folds for every model
